### CORE COMPETENCIES

- ✓ .NET 8 / .NET Core Backend Engineering & API Ecosystem Development.
- ✓ Database & Performance Optimization.
- ✓ RESTful API Design, Integration & Microservices Readiness.
- ✓ Full-Stack Application Delivery.
- ✓ Scalable ERP System Design & Multi-Module Platform Development.
- ✓ Technical Project Leadership Across Full SDLC and Application Architecture.
- ✓ Code Governance, Architecture Reviews & Multi-Team Oversight with deployment.

### KEY HIGHLIGHTS

- ✓ Designed and deployed scalable REST APIs that supported a user base growth while maintaining system uptime.
- ✓ Optimized SQL Server/MySQL database structures and queries, reducing heavy transaction load times and improving reporting efficiency.
- ✓ Directed cross-functional Agile teams through successful sprints, improving release cycle predictability and reducing production defects.
- ✓ Built and launched high-availability ERP modules and admin panels that automated manual processes, increasing operational productivity across departments.

### TECHNICAL SKILLS

- ❖ **Core Technologies & Frameworks:** .NET 8, .NET Core 6, ASP.NET, C#, Blazor, MVC, Web API, ADO.NET, LINQ, Entity Framework (EF Core), Dapper, Clean Architecture.
- ❖ **Backend Engineering & API Development:** RESTful API Design, Microservices, Modular Architecture, Integration Services, Payment Gateway Integrations (Razorpay, PayU).
- ❖ **Databases & Data Engineering:** SQL Server, MySQL, Stored Procedures, Query Optimization, Database Schema Design, Performance Tuning.
- ❖ **Programming Practices:** OOP, SOLID Principles, Design Patterns, SDLC, Agile/Scrum.
- ❖ **Frontend Technologies:** Blazor UI, Angular, React, Next.js, JavaScript, jQuery, Bootstrap, Theme Integration.

# VIMAL KUMAR

- Accomplished **Senior .NET Engineering Professional** with 10+ years of experience delivering **high-performance, large-scale applications** using **.NET 8, .NET Core, C#, Blazor, Web API, and Microservices** within modern architectural frameworks.
- Core competencies in **.net backend engineering, RESTful API ecosystems, OOP and SOLID principles & Clean Architecture** ensuring robust, maintainable and future-ready codebases.
- Hands-on with **Blazor, Angular and React** for scalable modular development.
- Specialized in building **enterprise ERP systems, secure and scalable admin panels, and data-intensive workflow applications** with deep expertise in **SQL Server, MySQL, NoSql**, and performance-driven database optimization.
- Proven ability to integrate and maintain **high-volume payment gateway solutions** including Razorpay and PayU, enabling secure and frictionless digital transactions.
- Strong command over **end-to-end SDLC leadership**, including requirements engineering, architecture design, sprint planning, code governance, and deployment management across agile environments.
- Enhance working in **Node.js and NestJS along with NextJS** framework, strengthening multi-technology exposure.
- Working cloud environments **AWS** and **CI/CD**.

### WORK EXPERIENCE

**Manager - Software Development | Sri Aurobindo Group | Jan 2018 – Jan 2026**

#### Roles and Responsibility

- Spearheading the architecture, development, and enhancement of enterprise-grade applications built on **.NET 8, .NET Core, Blazor, and RESTful API** frameworks.
- Designing optimized database structures and performance-focused queries across **SQL Server, Azure and MySQL** for high-traffic systems.
- Enhance development skills with **Node.js, React.js, Angular.js, Next.js, and Nest.js**.
- Working with cross-functional development team, driving code quality standards, architectural governance, sprint execution, and technical decision-making.
- Implementing and integrating payment gateways (Razorpay, PayU) to support secure, high-volume online transactions.
- Deployments on **AWS, IIS and Plesk**, ensuring stable environments, configuration consistency, and smooth version rollouts.
- Reviewing multi-stack code (backend, APIs, UI) and ensuring seamless integration between .NET applications, Blazor modules, and front-end layers.
- Directing API structuring, version control practices, architecture reviews, and release management for multi-phase product cycles.

**Software Developer | Bharat Heavy Electricals Limited (BHEL) | 2015–2017**

#### Roles and Responsibility

- Developed and maintained internal business applications using **ASP.NET, C#, and MS SQL Server** to streamline operational workflows.
- Built MIS dashboards for financial reporting, enabling leadership to evaluate “Proposed vs Actual Saving” metrics and accelerating decision cycles.
- Engineered IT and HR Helpdesk systems that automated request handling, resulting in significantly improved ticket resolution efficiency.
- Delivered user-facing portals including Online Quiz and Visitor Gate Pass systems improving engagement and administrative convenience.

**Software Development Trainee | Tech Code Solutions | 2014**

#### Roles and Responsibility

- Implemented functional improvements across existing applications, improving stability and user experience.
- Collaborated with backend teams to update core logic, optimize queries, and add minor feature enhancements.

- ❖ **DevOps, Deployment & Environment:** IIS, Plesk, Version Control (Git, Bitbucket), Build & Release Management.
- ❖ **Tools & Platforms:** Visual Studio, VS Code, SSMS, SqlYog, HeidiSQL, Jira.
- ❖ **AI & Modern Development Tools:** GitHub Copilot, ChatGPT/AI-assisted Coding, Prompt-based Development.

### SOFT SKILLS

- ❖ Strategic & Executive Engagement
- ❖ Stakeholder & Client Engagement
- ❖ Resilient & Results-Oriented
- ❖ Collaborative & Cross-Functional Leadership
- ❖ Adaptability & Agility in Fast-Paced Environments
- ❖ Client Relationship Building & Retention
- ❖ Creativity & Innovative Problem Solving

### CERTIFICATIONS

- 📖 Programming in C- NIIT
- 📖 Object-Oriented Programming Using C++- NIIT
- 📖 Introduction - Cloud Computing- NIIT

### EDUCATION

- 📖 MCA- SHIATS (Allahabad University) | 2019
- 📖 B.Sc. (IT)- KUVEMPU University Bangalore | 2014
- 📖 Software Engineering- NIIT National Institute of Information Technology | 2014

### PERSONAL DETAILS

- Languages: English, Hindi
- Date of Birth: 10<sup>th</sup> June 1993
- Address: Delhi

## PROJECT EXPERIENCE

### Project Inclusion (PI)

**Introduction:** A national initiative by Sri Aurobindo Group designed to empower teachers and special educators in identifying learning difficulties and fostering inclusive learning environments for students across India.

#### Roles and Responsibility:

- End-to-end development and delivery with tech-stack **.NET, .NET Core, API, Microservices, Clean Architecture, Reactjs** and **Nodejs**.
- Liaised with multiple departments to align functional needs, consolidate requirements, and translate them into scalable technical designs.
- Conducted deep-dive code reviews across **.NET, Blazor, React** and **NestJS** components to ensure consistency, scalability, and clean architecture adherence.
- Designed and optimized database structures and queries across **Azure Database, SQL Server** and **MySQL** to support large-scale user activity.
- Oversaw admin panel workflows, defining access roles, data management logic, and system-level configurations using **.NET and Blazor**.
- Deployment and storage over the IIS, Linux and AWS IAM.

### Learning Management System (LMS)

**Introduction:** A **plug-and-play LMS** designed as a **parallel integration** within **Project Inclusion**, enabling custom course creation, delivery, and user progress tracking.

#### Roles and Responsibility:

- End-to-end development and delivery with tech-stack **.NET, .NET Core, API, Microservices, Clean Architecture, and Blazor**.
- Worked closely with functional teams to capture requirements, define user flows, and ensure smooth integration with the primary PI application.
- Managed staging-to-production deployment cycles, ensuring uninterrupted release rollout and version stability.
- Developed scalable admin panel components and structured database schemas optimized for course, user, and content management.
- Deployment and storage over the IIS, Linux and AWS IAM.

### National Council for Teacher Education (NCTE) – Sri Aurobindo Group

**Introduction:** A government-oriented application developed to evaluate and identify top-performing educational institutions based on defined Ministry scoring parameters.

- Collaborated with stakeholders to gather requirements, map evaluation metrics, and design the system architecture accordingly.
- Developed the full application stack, including backend logic, workflows, and database structures aligned with evaluation criteria.
- Managed the admin panel configuration, reporting interfaces, and overall platform performance optimization.

### Director Reporting Dashboard – Bharat Heavy Electricals Limited (BHEL)

**Introduction:** A centralized reporting dashboard enabling Directors and senior leaders to directly access real-time reports from various departments and production units.

- Interacted with departmental heads to define reporting needs, data sources, and dashboard KPIs.
- Designed and developed the web application framework, ensuring high-speed data retrieval and intuitive visualization.
- Oversaw backend workflows, admin access modules, and performance tuning for seamless data availability.

### IT & HR Helpdesk Portals – Bharat Heavy Electricals Limited (BHEL)

**Introduction:** A unified helpdesk system designed to automate and streamline IT hardware requests and HR service workflows across departments.

- Collaborated with HR and IT teams to document request flows, approval hierarchies, and process dependencies.
- Designed and developed the complete web application, including ticket creation, workflow routing, and status tracking modules.
- Built optimized database structures and ensured efficient backend processing to support large-scale request handling.
